

FIELD SECURITY

(NUCLEAR POWER INDUSTRY, MEDICAL DEVICES)

We design, produce, test and put equipment into operation in a safe way where each employee is aware of risks related to consequences of his/her activities and eliminates them in such a way to avoid unfavourable events such as leakage of radioactive substances or ionizing radiation. We apply reliable and verified SW or HW tools and qualified personnel.

TECHNICAL DEVICES SECURITY

In realization of our activities we use reliable technical tools that are in accordance with technical standards and that are safely operated. After putting into operation we monitor life cycle of supplied equipment and we offer our clients checks and inspections to keep reliability of supplied equipment.

FINANCIAL SECURITY

We protect financial health of our company by ensuring financial sources sufficient for company operation and project financing, we prevent inefficient drawing of financial means.

INFORMATION SECURITY

We protect internal information and know-how including the information of parties involved, we ensure their availability, integrity and credibility using safe IS architecture and reliable SW tools. We manage protection of company information assets and risks related to their applying. We monitor safety incidents, set up and evaluate safety measures. We verify continuity of our activities.

PERSON AND PROPERTY PROTECTION

We protect property of our company and health of our employees by identifying risks of our activities and we adopt measures to eliminate their occurrence or to decrease their impacts. We keep both company workplaces and the workplaces at our customers tidy and we protect property against damage.

ENVIRONMENTAL PROTECTION

We manage environmental profile of our company by minimizing impacts of our products and activities on environment, we use the environment-friendly technologies and materials, we prevent damage to environment both at the company and customer's premises.
