

ZAT MISSION

ZAT supplies intelligent control systems for wide spectrum of branches all over the world.

We focus on the branches with high requirements for safety and reliability and for technologies and services demanding innovative and individual solutions.

We assist our customers in permanent increase of operation efficiency of their technologies.

MISSION FULFILMENT

We analyze needs and expectations of involved parties in a way to satisfy their current as well as future requirements and to achieve their satisfaction by doing so.

We are continuously improving IMS, setting goals and reviewing their achieving. We ensure permanent accordance with legal regulations in all our activities. We identify risks and prevent them or mitigate their impact.

We observe safety rules in individual branches (nuclear power industry, medical devices, etc.), technical means security, information security, financial security, person and property protection, environmental protection.

GOALS FOR VISION 2022

We control power energy starting from sources, transfer, distribution up to consumption

Using intelligent systems we process information for effective decision making not only in industry but in the non-manufacturing sphere too

We are a well-known Czech company

We are important market player

We develop company know-how

We have a great time in ZAT

OUR VALUES

Team

We are one team, we create in a teamwork way, we share our knowledge

Results

We care about result, not only about process itself

Trends

We search for and follow innovations in our field, we are open to new ideas
